Average Salary by Favorite Programming Language

### 📊 Top Earners

- **Job Title:** *Data Scientist* leads with an average salary of **\$94K**
- **Education:** *PhD holders* earn the most, averaging over **\$147K**

### 🌍 Geographic Trends

- **Highest Salaries:** *United States* at **\$79K**
- **Lowest Salaries:** *India* at **\$30K**, despite strong talent pool
- *Tech* leads industry-wise, followed by *Finance* and *Healthcare*

### 🔄 Career Switchers

- 💬 A large segment of high earners have **transitioned into data** from other fields.
- 💬 Career switchers earn **comparable or even higher salaries** than those who started in data roles directly, especially at advanced education levels.

### 📌 Top Insights

- 🔄 **Career switchers rival direct entrants**, especially with advanced degrees — proving that non-traditional paths into data can lead to top pay.
- 💻 Despite being underrepresented, **female professionals report slightly higher salaries** than males — challenging traditional pay assumptions.
- 📉 **High salaries don't guarantee high satisfaction** — job happiness remains moderate even in top-paying roles and countries.

### 💼 Gender Dynamics

- ⚖️ **Gender Ratio:** 74% Male vs 26% Female
- 💰 **Surprising Twist:** *Females* earn slightly more than males on average (\$55K vs \$53K)

### 😊 Job Satisfaction

- 💰 **Happiness with Salary:** Average score around **4.3/10**
- 📌 **Work-Life Balance:** Slightly higher satisfaction (~**4.8/10**)
- 🔄 **Non-financial factors** matter nearly as much as compensation

### 📌 What Professionals Value Most When Switching Jobs

- 🇸🇬 **Top Priority:** Better Salary
- 🏠 **Close 2nd:** Remote Work
- ⚖️ **Work-Life Balance**, Culture, and Learning come next
